

Purpose and Outcomes of the PGY1 Pharmacy Residency Program

Purpose

Saint Joseph PGY1 Pharmacy Residency Program will produce an exemplary clinical pharmacy practitioner. This pharmacist will be competent as well as compassionate in all interactions with patients, learners, and colleagues. Upon graduation from the program, this pharmacist will be able to pursue clinical positions with varying degrees of teaching responsibilities, or will be able to pursue a position in a PGY2 Pharmacy Residency Program.

Outcomes To Achieve This Purpose

Upon successful completion of this residency program, the pharmacist will be able:

To Teach

Successfully educate medical students, PharmD candidates, and family medicine resident physicians regarding the epidemiology, pathophysiology and evidence-based management of commonly encountered disease states.

To Treat

Empathetically provide direct and collaborative patient care while also being knowledgeable about the constructs or infrastructure that must be in place in order to practice.

To Lead

Effectively lead initiatives that improve the practice of pharmacy, focusing on patient care, performance improvement, and medication safety.

Through Teamwork

Actively lead or participate on relevant multidisciplinary teams or committees.
